PRECAUTIONARY STATEMENTS

In all cases, it is recommended that a
small scale test for compatibility be
conducted before mixing a full batch.

DESIGNED AS AN IRON SUPPLEMENT FOR PROMOTION OF DARK GREEN LEAF COLOR

Amino Iron is a growth enhancing formulation that
contains proprietary amino chelated iron and
biostimulants. The ingredients stimulate nutrient
uptake, nutrient penetration, and nutrient utilization.

Amino Iron has also been specially reacted with
emulsion polymerization that provides a wide range of
mixing ease with other fertilizers or products.

Amino Iron works best as a foliar application on plants to
prevent or correct trace element deficiencies that usually
occur during growth periods. Amino Iron is readily available
and rapidly absorbed by the plant because of the natural
complexing and chelation properties. It is water soluble and
non-toxic to plants when applied as directed.

Application Information

Apply at the rate of 1-3 oz/1000 square feet in 0.5-1.5
gallons of water. Allow 4 hours before rain or irrigation.
Can be tank mixed with most TRACK liquid products.

Apply every 2 weeks throughout the growing season.
