PRECAUTIONARY STATEMENTS

In all cases, it is recommended that a small
scale test for compatibility be conducted
before mixing a full batch.

Soil-Max is a Bio-technical Soil Conditioner

THE UNIQUE PROPERTIES OF SOIL MAX

Soil-Max® is a soil activator designed as a soil conditioner, water penetrant, and bio-stimulant package chelated in part with glucosamine, a powerful chelating agent. When applied to the soil, Soil-Max® promotes water/nutrient penetration and uptake. Water holding capacity and air movement into and out of the soil improve due to increased soil flocculation. Soil-Max® breaks the surface tension between water and soil and promotes higher soil microbial populations.

ECONONMICAL AND EFFICIENT

Apply to all types of grass and soils. Soil Max reduces water surface tension AND provides long term environmental and biological benefits to soils.

TREATS SOILS WITH NATURAL INGREDIENTS

Unlike chemical, soap, and other surfactants, Soil Max will feed the soil microbes, liberate nutrients, and provide elements for long term soil health sustainability.

Application Information

Apply 6 oz/1000 sq ft in the spring, prior to water stress conditions, followed by 4 oz/1000 monthly.
